ENGLISH: A REPORT ON THE CORONA
VIRUS PANDEMIC ON THE CITIZENS
OF NIGERIA AND THE EFFECTS OF
THE CORRENT LOCK DOWN

LAW

COVID 19!! CORONA VIRUS DIESEAS OF THE YEAR 2019

The already risen pandemic of the year this pandemic has been rumored to be a plot of wickedness by the Chinese people, said to be because of the population crisis currently on going in china or a way to put their foreign enemies to rest, rumors which have not been verified.

This pandemic is a deadly virus spread through physical contact this pandemic has been noted to be responsible for over a hundred thousand deaths all over the world, but just 14 in Nigeria this pandemic has very much disrupted the world let alone the people of Nigeria and as I will like to discuss this various ways it has disrupted the activities of the world

Firstly I will like to comment on the ongoing lockdown this alone has caused a lot of discomfort in the country, we all know how normally the thought of being locked or trapped somewhere is so uncomfortable even in the comfort of your own home it is still regarded as a discomfort let alone the many more things it has done and many more damages it has caused

Now I will be talking about how it has affected those going to school this pandemic has put a hold to many people academics, this has put people's lives on pause those who have hoped to graduate have been asked to stay home with no clue as to what they would do but wait another year this pandemic has made the academic resumption be unknown because as they say no one knows of the unknown.

Speaking of which we should also talk about the adults all working to fund an ends meet with no work means no salary no salary means no way to buy the things needed to survive even the market people don't have work as they cannot sell anything being as the law is that if you are seen outside you will be arrested or

killed which sadly has happened I'm sure we are all aware of the boy killed for being found outside, so seeing as no one wants to die or be affected they are forced to stay home which means as well no money to take care of them or their family

Lastly and sadly the unfortunate ones those who have no place to call home sleeping under bridges' this are the people that suffer a lot and this pandemic most certainly hasn't done anyone a favor especially these ones although people have opened their doors to them to support them even those who haven't found homes all we can do is pray for them.

I hope that my report is to your liking as we all need to be alerted the cases in the county the things we see these days that have left us to wondering but in all we do hope and pray God comes to our rescue once again.
