

Name: Ekundayo Oluwatobi Favour

Matr. No: 18/EN001/010

Department: Chemical Engineering

Assignment

$$y = y_0 e^{kt}$$

$$y = 3y_0, \quad \frac{y}{y_0} = 3$$

$$\text{at } t = 9: \quad \frac{y}{y_0} = e^{kt} = 3$$

$$\text{at } t = 18: \quad \frac{y}{y_0} = e^{kt} = 9$$

$$y_0 = 50 \quad \dots \quad (1)$$

$$y_0 = 150 \quad \dots \quad (2)$$

$$y = 50 e^{kt} \quad \dots \quad (3)$$

$$y = 150 e^{kt} \quad \dots \quad (4)$$

$$3 = e^{kt}$$

$$\ln 3 = kt$$

$$\ln 3 = 9k$$

$$k = \frac{\ln 3}{9}$$

$$k = 0.122$$

$$9 = e^{kt}$$

$$\ln 9 = 18k$$

$$\frac{\ln 9}{18} = k$$

$$0.122 = k$$

$$\therefore k = 0.122$$

$$\text{for A, } y = 50 e^{0.122t}$$

$$\text{for B, } y = 150 e^{0.122t}$$

$$t = 0, 1, \dots, 15$$

$$A(t) = 50 \exp(0.122 \cdot t)$$

A(t) =
