ENG282 Assignment 6

$$y = y_0 e^{kt}$$

$$y = 3y_0; \frac{y}{y_0} = 3$$

$$A \frac{y}{y_0} = e^{kt} = 3 \text{ at } t = 9$$

$$B \frac{y}{y_0} = e^{kt} = 9 \text{ at } t = 18$$

$$\therefore A y_0 = 50 \text{ ---- i}$$

$$B y_0 = 150 \text{ ---- ii}$$

$$\therefore y = 50e^{kt} \text{ ---- iii}$$

$$y = 150e^{kt} \text{ ---- iv}$$

$$3 = e^{kt}$$

$$\ln 3 = kt$$

$$\ln 3 = 9k$$

$$= \frac{\ln 3}{9}$$

$$k = 0.122$$

$$9 = e^{kt}$$

$$\ln 9 = 18k$$

$$\frac{\ln 9}{18} = k$$

$$18$$

$$k = 0.122$$

$$\therefore y = 50e^{0.122t} \text{ ---- A}$$

$$y = 150e^{0.122t} \text{ ---- B}$$
