$$y = y_0 e^{kt}$$

$$y = 3y_0; \frac{y}{y_0} = 3$$

$$A = \frac{y}{y_0} = e^{kt} = 3 \text{ at } t = 9$$

$$B = \frac{y}{y_0} = e^{kt} = 9 \text{ at } t = 18$$

$$\therefore A \cdot y_0 = 50 \dots (1)$$

$$B \cdot y_0 = 150 \dots (2)$$

$$\therefore y = 50 e^{kt} \dots (3)$$

$$y = 150 e^{kt} \dots (4)$$

$$\ln 3 = kt$$

$$\ln 9 = 9k$$

$$k = 0.122$$

$$9 = e^{kt}$$

$$\ln 9 = 18k$$

$$\frac{\ln 9}{18} = k$$

$$k = 0.122$$

$$y = 50 e^{0.122t}$$

$$y = 150 e^{0.122t}$$
