 ENG 282 Assignment A

$$y = y_0 e^{kt}$$

$$y = 3y_0 ; \frac{y}{y_0} = 3$$

~~A~~
$$\frac{y}{y_0} = e^{kt} = 3 \text{ at } t = 9$$

$$B \frac{y}{y_0} = e^{kt} = 9 \text{ at } t = 18$$

$$A \quad y_0 = 50 \dots \textcircled{1}$$

$$B \quad y_0 = 150 \dots \textcircled{2}$$

$$\therefore y = 50 e^{kt} \dots \textcircled{11}$$

$$y = 150 e^{kt} \dots \textcircled{12}$$

$$A \quad \therefore 3 = e^{kt}$$

$$\therefore \ln 3 = kt$$

~~$$\ln 3 =$$~~

$$A \quad \ln 3 = 9k$$

$$k = \frac{\ln 3}{9}$$

$$k = 0.122$$

$$B \quad \therefore 9 = e^{kt}$$

$$\ln 9 = kt$$

$$\ln 9 = 18k$$

$$k = \frac{\ln 9}{18}$$

$$k = 0.122$$

$$A \quad \therefore y = 50 e^{0.122t}$$

$$B \quad \therefore y = 150 e^{0.122t}$$

$$r = 0.1, 15$$

$$A(t) = 50 \exp(0.122 \cdot t)$$

A(t) =

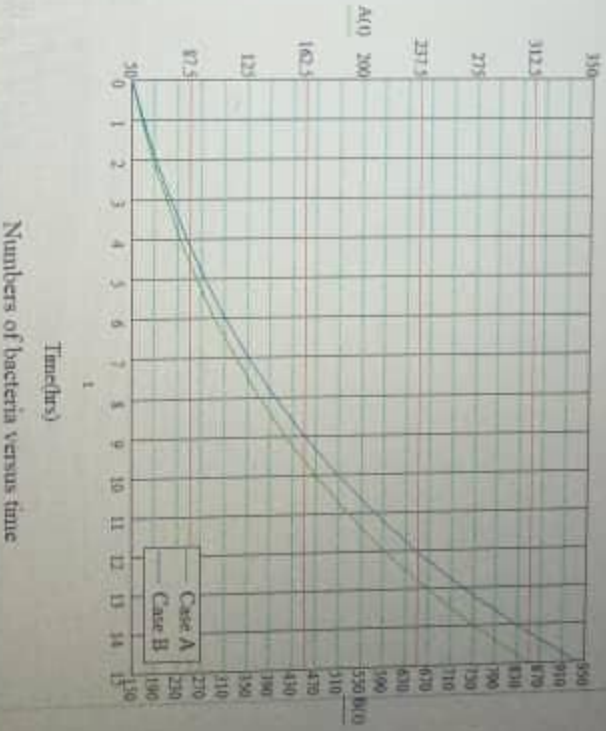

50
