

The period when which the system would  
remain is not to be taken by to prevent the  
spread of COVID-19 is that individuals are advised  
to stay home as much as possible, no social  
gatherings, avoid unnecessary travel, avoid  
public transport, avoid crowded places, avoid  
visiting and staying at care with care, avoid  
crowded and public places, avoid other and calling the  
NCD. ~~if any symptoms~~ if any symptoms is observed.

As a result of this COVID-19 ~~the~~ the  
demand for many goods is really affecting  
people. one of the effects of lockdown ~~is~~  
the effect of restriction of movement and  
is full in household. This restriction of movement  
is really affecting people through the reduction of  
consumption expenditure ~~and~~.

Another effect of this lockdown is the lockdown  
of market for 14 days has cause turbulence  
in market and the world's price can  
be high. Price of goods and foods.

This lockdown even affect people who  
engage their self in daily earning because it  
has ~~effect~~ effect their standard of living ~~and~~ which  
create lack of basic commodity which make  
it difficult for them to survival. ~~and~~  
It will also be hard for such individuals to  
participate in the lockdown when their household  
depend on their daily earning.

### COVID-19 PANDEMIC

Coronavirus disease which is known as COVID-19 is an infectious disease caused by a newly discovered coronavirus. Most people infected with the COVID-19 virus will experience mild to moderate symptoms and typically recover without requiring special treatment.

The virus that causes COVID-19 is mainly transmitted through droplets generated when an infected person sneezes, coughs, or breathes. The virus is too heavy to ~~survive~~ hang in the air and quickly fall on surfaces. An individual can be infected by breathing in virus or within a close ~~quarter~~ gathering or proximity place at somebody who has coronavirus and by touching contaminated surfaces like windows, or door handle and then ~~touching~~ touching the same hand ~~to~~ in your nose, eyes, and mouth. This are the most easier place that COVID-19 can passing through your body and this can make an individual to be infected by the virus.

The most common symptoms or signs of the COVID-19 are fever, cough, sneezing, sore throat, and difficulty in breathing etc. In most severe cases infection alone can cause severe acute respiratory syndrome, and it can even be fatal and can also cause ~~respiratory~~ ~~illness~~ ~~it~~ ~~the~~
