

At a point, one gets restless and start conjuring thoughts to change class. ~~But, there, gets their daily work or~~ ~~extended for a day~~ ~~business~~

Also there a people who gets their daily food or essential from a days business. Therefore due to this lockdown, their means of getting food or essential has been cut off. These people are prone to stealing to get by daily as a means of survival. No one wants to die of starvation or hunger.

Also, all religious gatherings have been called ^{off} to prevent contact and also prevent this virus from spreading. The Easter celebration and all other activities before the easter celebration had ~~to~~ to be done live on TV with citizens watching from their homes.

Due to all work put to a halt, the economy is falling. Profit is decreasing and loss is increasing. The government is putting a lot of money into building isolation centres, catering for the patients need as well as the doctors and other medical staffs. The government is also trying to send relief packs to those in need. With all the money going out and no money coming in is putting a strain on the country's economy.

At some point when it seems like everything is under control, new cases are confirmed and deaths are also recorded. Nobody knows when the lockdown will be over or if it will be extended. These thoughts are keeping people restless while anticipating their news from their homes.

This virus has affected citizens, society, nation and till the cure is found or a vaccine is produced. We all are restricted from leaving our homes.

Corona virus has made an impact more on the negative side than the positive side by the daily activities of citizens and as a whole, the nation. The virus which originated from China has spread worldwide. Over a million cases and 100,000 deaths have been recorded. The number of those who have recovered is very low. The virus still has no cure but it can cure by self-isolation and quarantine to prevent it from spreading. The virus is why the lockdown has been put in place to restrict citizens from moving and therefore spreading the virus. The lockdown is serving its purpose but with that comes difficulties as it has put a halt to all our activities including, work, school, etc. Everything has been put to a halt and therefore has disrupted the balance of our daily lives.

Firstly, the restriction has caused a disruption of balance in the academic activities of all academic institutions. Students who were in the middle of academic activities were being moved to finish the session with their examinations while some which the decision was too abrupt for were forced to get everything to a stop and go home. Nobody knows when examinations start or where they stand in academic activities. This is what the restriction has caused.

Another disadvantage is that the crime rate has increased. There are "acting just goes" as our idle men is the devil workshop". We are all in our homes sitting down waiting for the lockdown to end. The more we wait, the longer the lockdown is extended.
