

declared that some vulnerable state should be locked down. Some states observe them like Ogun, Oson, Ekiti and so on and so forth.

EFFECTS OF LOCKDOWN AND RESTRICTION OF MOVEMENT IN NIGERIA

Lockdown is an emergency protocol that usually prevents people or information from leaving an area. The federal government has ordered an ultimate lockdown in Nigeria. The positive effects of the lockdown in Nigeria are:

- It allows family to bond together and do things together.
- Relaxation of those who don't have time for themselves before the lockdown.
- It opens opportunity to a lot of useful life skills.
- Spend more time with God.
- Have a lot of time to study.
- reduce risk of road accidents.
- widening the horizon of youth to be a better citizen of the country.

The negative effects of the lockdown includes

- It increases vices such as stealing, prostitution, armed robbery ^{in the} society.
- It causes inflation.
- It disrupt the academic calendar of student.
- Mortality rate increases because of hunger.

CONCLUSION

To cap it all, Coronavirus has caused a lot of negativity in Nigeria. The federal government of Nigeria through the federal ministry of health in conjunction with the Nigeria center for Diseases are trying their best to ensure that this pandemic is being controlled. So, stay home and safe from coronavirus.

REPORT ON THE CORONA VIRUS PANDEMIC AND THE EFFECTS OF THE LOCKDOWN AND RESTRICTION OF MOVEMENT IN NIGERIA

INTRODUCTION

Corona virus is also known as a COVID-19. It was emerged in Wuhan, China on December 31, 2019. Corona virus belongs to the Coronaviridae family in the Nidovirales order. At the end of 2019, Wuhan and emerging business hub of China experienced an outbreak of the disease corona virus that killed more than eighteen hundred and infected over 70 thousands individuals within the fifty days of epidemic. Anybody with this pandemic shows symptoms five days but it will range from 2 to 14 days. The symptoms are coughing, sneezing, difficulty breathing, diarrhoea, fever and loss of smell. The virus can be easily spread when an infected person is in close contact with a non-infected person. It begins with the infected person sneezes, when talking to a non-infected person, in the process, the virus can be contacted through the air especially when it is a crowded place.

Currently there is no vaccine but the preventive measures is by washing ones hands regularly for two seconds, maintaining physical distance from others.

CORONA VIRUS IN NIGERIA.

Corona Virus cases as been increasing drastically in the past few months since Feb, 27th 2020. It has taken more than a hundred thousands in some countries where some Nigerians too visited, and the COVID-19 spread like wildfire, especially from frequent returnees and international travelers who are Nigerians. The President

declared that some will observe them like...
