DATE: 19TH APRIL, 2020

Write a report, of not more than two pages, on the corona virus pandemic and the effects of the lockdown and restriction of movement in Nigeria.

Corona virus popularly known as covid-19 is a new disease that originated from Wuhan in China in December 2019, it is a contagious disease that can spread through droplets from the mouth and nose, it can also spread through close contact with an infected person, surface and so on. There is ~~no~~ currently no known cure for this disease but it has ways of prevention such as washing your hand with soap and running tap water, making use of a face mask, sanitizing your hands with ~~a~~ an alcohol based sanitizers, social distancing, etc. These prevented measures were brought up by the ~~ND~~ NCDC (Nigeria Center for Disease control) so as to ensure the safety of the citizens.

P. T. O

Now, the governments of several affected states in Nigeria have put an order that everyone should stay at home [indoor] as a very big and important way of preventing this disease from spreading, for currently we have over four hundred infected people with covid-19. It's a good thing though implementing the law, but at the same time it has its negative sides.

"Stay at home" as they may call it, is a very difficult thing to do because everyone needs to go out so as to make money for the provision of food for their families. The government on their own side is meant to provide their citizens with food and food stuffs so as to compliment their staying at home. Citizens of the country are dying of hunger, mostly the poor that suffer to get what to eat.

Though positively, it's a very good way of preventing the spread of this deadly disease, the citizens are disturbed because they are hungry, this can even lead to increase in crime rate [going about stealing food from neighbours], riots in different states and even deaths.

In conclusion, lock down is a very positive way of preventing the spread of the disease though, but there are still lots of side effect that should be looked into by the government.
