Report on the Corona virus pandemic occurring in the country and at large
Corona virus abbreviated as COVID-19 and also given the name as SARS-COV-2
Is a newly discovered infectious disease that affects mainly the respiratory system
And heart system causing death for both those with weak immune system. Currently
Is recorded that exactly 20 states confirmed are faced with the disease with Lagos
Having the highest number of cases of 282 cases. The government has not failed
To perform their duties by taking preventive measures in order to avoid the spread of the
disease which causes the country to go into a state of lockdown where activities that could
lead to the spread of the disease be prevented.

The restriction of movement, foodstuff bought for sale is therefore in waste as it is either
Returned to its destination by securities sent or organized by the government. Most Nigerians seem to
be affected by this lockdown as market places have been closed causing people to face hunger, making
Them scared of starvation and it has also caused the losses of many businesses.

Youths have issues with the lockdown system as they are made unemployed and those who tend
To use little business to survive are suffering severely. In order to prevent the hunger that the citizens
Are going through, they have therefore provided the citizens with foodstuffs and pay in money into
Bank account of citizens with foodstuffs and pay in money into bank account of citizens with Bvns
In order to sustain them while they are going through the lockdown system.

In conclusion, Nigeria should endeavour to ensure that they go by the measure in preventing
The spread of the disease and the lockdown system has been activated to ensure that the disease
Would be prevented from spreading and from there people will be free to do their daily activities
Again
