### **WHAT IS CORONAVIRUS?**

Coronavirus also known as Covid-19 is zoonotic, meaning they are normally transmitted between animals and people. It was first detected on the 7th of January 2020 in Wuhan, China. some coronaviruses can be transmitted from person to person, usually after close contact with an infected patient. For example in a household or housecare setting.

The coronavirus pandemic which simply means this disease is prevalent over the world and is widely spread. This pandemic has caused there to be lockdown in different places of the world and has restricted people from moving from place to place and doing their daily to daily activities.

This lockdown been conducted is also held in Nigeria and there a lot of effects concerning this lockdown. one of these effects are; the fact that a lot of nigerian whose means of financial income is earned daily or weekly or even their monthly salary is usually very small are no longer working due to this lockdown and they have to feed

themselves especially those who have children to feed are really finding it difficult to cope during this lockdown and the Government should really look into this.

Secondly, another effect is the lack of electricity supply, the fact people are asked to stay at home also means that there should be constant electricity supply in all houses to make them more comfortable so it won't also result to them buying fuel for their generators cutting much more of the money they are meant to use to feed which is very important.

Thirdly, this lockdown has stopped students of all age-groups to stop going to school for the main time and this is really slowing down the educational system for example examination writing students like primary 5, jss3 and ss3. Even if students are asked to read at home not all will be able to due to distractions and not all schools will be able to conduct online classes.

These are some effects which this lockdown has caused and it is really affecting our citizens, the government should also try to look for a way this lockdown will not be able to cause more problems to our country.
