psuedocode to compute the grade of student if else statement

```
1 Begin
2 input grade
3 if(grade <= 40)
4     display ('you failed this course')
5 end
6 else if (grade => 45)
7     display ('your grade is D')
8 end
9 else if (grade => 50 )
10    display ('your grade is C')
11 end
12 else if (grade => 69)
13    display ('your grade is B')
14 end
15else if (grade => 70)
16.  display ('your grade is A')
17end

16 else if (grade ==100)
17    print('distinction')
18 end
```
