psuedocode to compute the grade of student if else statement

```
1 Begin
2 input grade
3 if(grade <= 40)
    (print you failed this
course)
4 end
5 else if (grade => 45)
6   (print 'your grade is D)
7 end
8 else if (grade => 50 )
9   (print 'your grade is C)
10 end
11 else if (grade => 69)
12  print 'your grade is B)
13 end
```

```
14 else if (grade => 70)
    (print 'your grade is A )
15 end
```

```
16 else if (grade ==100)
17  print('distinction')
18 end
```
