Question 1

10 features of a good Cyberpreneur

1. **Creativity:** Cyberpreneurship starts with an idea. To be successful, you need to always be thinking of new ideas and better ways of doing things. They are not satisfied with the status quo. They think outside the box and look for opportunities to come up with new solutions.
2. **Passion:** Perhaps, this is the most important characteristic for entrepreneurs, passion is essential to any business owner or working professional's success. Without passion, there is no reason for your work and no drive to do it. Cyberpreneurs love what they do and are extremely dedicated to the businesses they create. To be successful, you must be confident in yourself and your business, and you must be proactive with what you do and how you do it.
3. **Motivation:** Because of their passion for their ideas, entrepreneurs are willing to put in the long hours and hard work required to launch and run a successful new business. Cyberpreneurs are their own boss, which means there's no one telling them to do things. You must be in charge of your own time and how you spend it.
4. **Optimism:** Optimism deals with one's view about a situation. Do one see the glass half empty or half full? For cyberpreneurs, it's always half full. Cyberpreneurs always look on the bright side and are constant dreamers. They look at how they can do things better and make the world a better place. They never dwell on the past or the negative. Instead, they focus on moving forward and moving up. When they're confronted with challenges, cyberpreneurs don't see them as problems; they see them as opportunities. Challenges fuel entrepreneurs and make them reach higher and do more.

5. **Future-oriented:** Because cyberpreneurs are focused on moving forward, they are always looking toward the future. Cyberpreneurs are very goal-oriented and know exactly what they want. They set their goals and everything they do is aimed at achieving those goals. Having a strong vision helps propel you toward accomplishment.
6. **Persuasive:** To be successful in business, you have to know business. If you're a people person and know how to get people to listen to you, you could be a successful Cyberpreneur. Especially when first starting out, cyberpreneurs need to gain buy-in from those around them on their big idea. If it's an out-of-the-box idea, which it usually is, many people will be skeptical before giving their support or investing any money. That's why cyberpreneurs need to use their persuasiveness to sell themselves and their ideas.
7. **Flexible:** Cyberpreneurs should know how to adapt to unfamiliar situations. If their business requires that they learn how to build a website or send an invoice, they'll do it. Whatever it takes, entrepreneurs are ready and willing. They always approach things with an open mind and are willing to change course if they need to.
8. **Resourceful:** In business, problems aren't a matter of if, but when. Cyberpreneurs do not shy away from challenges or conflicts. Instead, they face them head on and come up with a solution. They know how to solve problems effectively. Cyberpreneurs also know how to make the most of what they have. Time, money and effort are never used haphazardly. Everything has a plan and a purpose.
9. **Adventurous:** In an interview with Y Combinator president Sam Altman, Facebook founder Mark Zuckerberg said, "In a world that's changing so quickly, the biggest risk you can take is not taking any risk." Cyberpreneurs know that to be successful, they must be willing to take risks. While they don't mind walking on the wild side, they don't take risks lightly. They know how to plan for the unknown and make a calculated decision that is best for them and their business.
10. **Decisive:** There is no room for procrastination in business. Cyberpreneurs know what needs to be done and don't hesitate to make the decisions that will lead them to success. They don't let opportunities pass them by; instead, they seize the day and get the job done.

Idea: A multiplatform mobile application for tracking of corona virus symptoms.

The multiplatform application which would be available for both Android and iOS devices while would be used to track corona virus in the sense that is a person is showing symptoms for corona virus, the person can be tracked and attended to through the application.

It would include the following:

Framework for development: The application would be developed by Flutter, which is a framework introduced by Google to create application both in Android and iOS devices.

Database: It would also make use of a reliable database for secure storage of information. The database that would be used is Firebase by Google.

Map API: The map API to be used with be the Google Maps API because of its coverage.

Operation: Every user would sign into the application with their phone number and password, the data would be verified and stored. Then an automatic request of location would be sent to the user, this is what makes the tracking of the location possible.

So, if a patient is having symptoms with travel history and he wants to confirm if he has the virus or not. There is a function which would make it possible to notify NCDC(Nigeria Center for Disease Control) and the person can be easily contacted to observe self-isolation till he/she is tested.
