Good day sir, though the effort of the school and it's lecturers are very commendable in trying to keep us engaged this period, the online classes are not really helpful in the sense that when it comes to calculations the students are lost and can't properly communicate with the lecturers to address the problem. If it's for theory based courses or theory aspects, then the online classes are

good, but when it comes to calculations, everything goes downhill from there.

There are a lot of problems faced especially network issues, small number of allowed participants, etc. Can I please recommend that the lecturers have a way of explaining and breaking down what has been done in class like a revision maybe, in a video, upload it to the cloud by drop box and pass the link to us so we can have better understanding of what was taught.
