

**NAME:** OKOYE OLUCHI TELMA

**MATRIC NUMBER:** 17/sms02/043

**DEPARTMENT:** ACCOUNTING

**COURSE:** PRODUCTION MANAGEMENT ACC318

**Answer**

The following are the production services being provided due to the Covid-19 pandemic

● **Health care and health technology;**

As a result of the Covina-19 pandemic the provision or health care to patients world wide has been increased and also health care related facilities and apps that would help reduce the spread of the disease has been created, apps that would help monitor one's health and also provide advice on what someone sick can do before proper treatment can be carried out or provided and many programmers have worked hand in hand with doctors so as to provide apps that would be able to allow the patients to communicate with doctors even during the lock down process. Other health care devices are being produced to provide health care services to the mass and investing in this area would be wise and would bring about high profitability.

- **Production of hand sanitizer and other sanitizer products;**

Due to the corona virus researchers have been able to discover that hand sanitizer and other sanitizer products have been able to kill the virus in surfaces and on the hand so it is advisable to use such products and thus has led to the increase in the production of these products by many companies some companies convert into the production of such products while some individuals invest in these products for it is the highest selling products being provided.

- **Soap production;**

Due to the corona virus pandemic and the fact that it had been proven that washing the hands regular can help reduce the spread of the disease investing in the production of soap and other disinfectants is also wise due to its high demand in the market.

- **Telecommunication services;**

Due to the lockdown many students and companies have been closed off And this has led to do use of technological devices to enable communications between students and their teachers which has helped them to continue with their academics even in the comfort of their homes and has also helped many workers keep in touch with company affairs or matters that are work related. Investing the telecommunications industry would be greatly advised and would yield a lot of profits.

- **Face mask, gloves and other body protection gears production;**

One of the ways to prevent contacting the virus is by social distancing or the use of face mask gloves and other body protective gears, this has lead to the increase of such items and investing in the production of these items would be advantageous as it would yield a lot of income in the market due to its high demand.

- **Electricity services;**

Due to the coronavirus pandemic a lot of people have been restricted to stay in their houses and to make this easier and more comfortable for them the production of proper electricity and other power plants services have been increased and investment in such sectors would be wise as it would generate large income.

- **Entertainment;**

Staying at home isn't easy with nothing to do and this could be very boring that is why the entertainment industry has been providing non stop entertainment services for the masses and investing in this area can also be considered, companies like GOtv and DStv can be invested into to help decrease boredom and increase viewings.
