Write a report of not more than two pages on the coronavirus pandemic and the effect of the lockdown and restriction of movement on Nigerians.

Corona virus disease is an infectious disease caused by a newly discovered corona virus. Most people infected with these virus will experience mild to moderate respiratory disease and recover without requiring special treatment. Infected people may ~~also~~ develop common symptoms like fever, tiredness, dry cough, aches and pains, nasal congestion, running nose, sore ~~the~~ throat, diarrhoea. It could take up to 14 days for these symptoms to show. The best way to prevent and slow down the transmission is to be well informed about the virus, how it ~~is~~ spreads and the disease it causes. Protect yourself and others from this infection by washing your hands or using an alcohol based rub frequently and not touching your face.

The virus spreads primarily through droplets of saliva or discharge from the nose when an infected person coughs or sneezes. Thus, it is important to practice respiratory etiquette while sneezing or coughing.

At present, there is no specific vaccine or treatment for the virus. But there are preventive measures that has been advised by the health personells which includes washing your hands regularly with soap and water or using an alcohol based hand rub. Avoid touching your face, cover your mouth and nose when coughing or sneezing with your elbow, maintain at least one meter distance between you and anyone coughing or sneezing. It was also advised that any form of public gathering should not hold because it could increase the rate of transmission as one infected person can transmit to about 10 people in a gathering. This made the government to result to a complete lockdown of every school, business and markets, even churches and mosques.

The effect of the lockdown and restriction of movement has been very apparent in all the states of Nigeria, as the coronavirus pandemic has had a big effect on the nation's economy. Provisions of ventilators and isolation centers for the victims, paying the government health workers has affected the country's economy a lot. Unfortunately, there is no transaction to compliment this budgets as the lockdown brings every business to a close and forced everyone to stay indoor to ~~avoid~~^{contain} the spread of the virus.

Seeing as the rate of poverty increased and the cry of hunger increased drastically it shows that the shutting down of markets, super markets and other jobs that involves daily transaction is of no advantage to the people because most of those market traders fend for themselves from their daily income but due to these lock down some families barely eat once a day not to ~~talk~~ talk of three square meals daily. And these has led to an increase in crime rate as we now hear of robbery from almost every state in the country, seeing the type of goods that are being stolen we can easily tell that this act erupted from their ~~big~~ hunger and strive to survive.

The lock down also led to an abrupt pause to religious activities because of the risk of the spread of the virus.

The lock down caused a break in the middle of the session and schools were forced to close down to avoid the spread of the virus.

Seeing as we don't know the end of this virus yet and the number of ~~the~~ infected keeps increasing. More ~~the~~ effects might be seen before the end of this.
