QUESTION 6

Shortworkings allowable and shortworking recoupable are shown as liability and assets respectively in the statement of financial position thus, follows the prudence concept which states that provisions should be made for all losses and due case should be exercised in recognizing profit. In this case the landlord exercises due case not to recognize the shortworkings yet not until they are lapsed and the tenant on his part does not record the loss up until he is unable to recover it . It also follows the realization concept in that the landlord does not record the shortworking as profit until it lapsed and the tenant does not realise his loss until he is unable to recover it.
