1). Enumerate success factors in project management.

= Risk Involved

= Scheduling

= Cost

= Quality

= Time

= Scope of Work.

2). The utilization of strategy is important in organizations as it provides management to align the organization's functional activities to achieve goals.

*Utilization of strategy allows for the proper guided use of resources, minimization of cost and maximization of profit as well as usage of other tool so as to achieve set goals.

*Energy, on the other hand, seeks to encompass all skilled and unskilled staff members playing a variety of roles in the strategies drafted by the company or organization.
