FLEXIBLE KEYBOARD

These keyboards work just the same as standard keyboards but are meant for people on the move. They are typically made of silicon which is water and dust-resistant and don't require constant cleaning.

Uses of Flexible Keyboard

(1) It is used for those who spend a lot of time travelling and outdoors; it can be rolled up and stuffed into a bag and is resilient in outdoor situations.

GAMING KEYBOARD

They are created for use for long periods of time often adopting ergonomic designs for comfort and also lighted keys for playing in the night. They

These keyboards are also built with programmable keys that can be adapted to the kind of gamer you are.

WIRELESS KEYBOARD

It is exactly what it's called a keyboard without a wire. It is connected to your computer with infrared 2.4 GHz WiFi or more often through bluetooth.

These keyboards can be used if you connect your computer to either a screen or television so you can control it from the comfort of your bed or sofa.

MEMBRANE KEYBOARD

Unlike the majority of keyboards, membrane keyboards don't have space between the individual keys. These keys are pressure sensitive and are divided by an outline for each symbol, letter or number.
