Economists are necessary for analysing data using mathematical models, statistical techniques, and software which have been proposed by engineering managers on a project. Economists working for corporations help managers and decisionmakers understand how the economy will affect their business. Specifically, economists may analyze issues such as consumer demand and sales to help a company maximize its profits.

Project manager is a person who has the overall responsibility for the successful initiation, planning, design, execution, monitoring, controlling and closure of a project hence require the help of economist about the market they are releasing too to know the optimal values and cost to put forward

An **engineering manager** is responsible for ensuring that key projects and **engineering duties** are fulfilled. They are responsible for solving any **engineering** issue that comes up in a project. Hence they work hand in hand with project managers who have already laid out the plan and line of work
