1.Material determination

First of all, I will advise the president of to get good engineers to determine the best materials to do the job in mention.

2. Quality supervision

All jobs done should be properly supervised by a well experienced engineer, depending on the aspect of the engineering work to be done , with ho from any additional professionals if necessary.

3. Creating A Budget

As an engineer who knows the average costs of materials and labour-force required to do any job in the field in mention it should be less challenging to make a budget according to the allotted funds from the president.
