

IGOMU ENE MICHELLE

CHEMICAL ENGINEERING

17/ENG01/013

1.

Economists study how society distributes resources, such as land, raw materials etc. They will be involved in conducting research, collecting and analyzing data to monitor economic trends on issues such as energy costs inflation, interest rates economic feasibility etc.

2. An **engineering manager** is responsible for ensuring that key projects and **engineering duties** are fulfilled. They are responsible for solving any **engineering** issue that comes up in a project. They also have to prepare reports on the progress of any project. Through their roles as **managers**, they provide the environment, resources and high-level views necessary for **great** work.

3. A **project manager's** core **function** is to successfully execute a **project** within the estimated budget, time, and scope of the **project**. When **project managers** carry out a **financial analysis**, they do so to ascertain whether a **project** will be a profitable undertaking and would warrant **financial** investment
