CLASS TEST

Economists, engineering managers, project managers, and indeed any person involved in decision making must be able to analyze the financial outcome of his or her decision. Which are

1. Every person involved in the decision making of an engineering project has to consider the weight imposed on the finances by their decisions. For instance, the project managers have to know the right choice of material needed to complete the project. The material must be economic and durable.
2. Human Resources managers should look out for the input of the common workers or laborers both skilled and unskilled should be compared to their output.
3. Engineering managers and human resources also have to consider the effect of the needs of their workers as against the finances of the project. Human resources management could adversely and directly affect the finances of the project.
4. Engineering supervisor should ensure that the job done by the workers meet all the engineers requirements and specifications
