

OGBONNA VICTOR CHIBUZO

17/ENG04/048

ELECT/ELECT

SHORT TEST 2 OF 21ST MAY 2020

1. I would talk to the president, General Muhammadu Buhari on the various sectors of the engineering society that need to be optimized for the effective completion of engineering projects. There would have to be an increase in capital invested in this sector to enable fast & effective development in some of our facilities and improved work labor. This is to ensure all the right tools are available to complete engineering projects. And also, engineering courses in Nigerian schools have to be more IT- oriented so students can gain enough experience and understanding when tackling real world problems
