

Name: NWADIKE REGINALD-FRANCIS . C

Matric No: 17/eng02/052

Department: Computer Engineering

Course Title: Eng law

### **June Test 1**

1 Firstly as an engineer it is our duty to obey All rules and regulation guiding the country. Eng law is important to engineers in construction, consultancy, design analysis, fabrications . In the sense that when there is dispute the court will be satisfied with the valid contracts that exist

2 Eng law also gives the decision to produce a result most consistent with managerial objectives and the process of arriving at the best managerial decisions or best problem resolution.

3 Eng law also gives knowledge of forecasting and analysing available information regarding economic variables and relationships to prove the future

4 Eng law also gives knowledge of contract procedure like the contract parties and contract specifications

5 Eng law also gives knowledge to an engineer for effective planning of projects, directing and controlling resources to meet technical cost . Engineers help to develop the physical infrastructure we all rely on – transport networks, roads, bridges, water and energy supplies, and waste management. ... And by building this infrastructure, engineering has had a much wider and more lasting impact – it has helped to fuel economic growth.

6 Eng law quips engineers with quality management skills for managerial positions for project execution
