ENG 384 1st JUNE TEST

QUESTION 1:

THE RELEVANCE OF LAW, MANAGEMENT AND ECONOMICS IN ENGINEERING PROFESSION

- All the various laws that have been created are there to make engineers follow regulations, and stay compliant to government standards, and ordinances,
- It helps an engineer to also know his/her main business, i.e. to know what he/she is meant or expected to do, with given time.
- Another, relevance is immensely assisting in minimizing cost and expenses when purchasing equipment for usage.
- Furthermore, it helps the Engineer to give appropriate estimates of work he/she has been given to do, and to estimate what future investments can offer.
- Economics also plays a crucial role in the engineering profession, in which it helps in concise evaluation problems, and to develop economical solutions that will benefit, the community.
- Finally, management, law and economics also help an engineer to efficiently manage his/her employees, guiding them on proper ways to achieve goals and solve problems.
