ENG 384 – JUNE SNAP TEST 2

1 Eng law is important to engineers in construction, consultancy, design analysis, fabrications . In the sense that when there is dispute the court will be satisfied with the valid contracts that exist

2 Eng law also gives the decision to produce a result most consistent with managerial objectives and the process of arriving at the best managerial decisions or best problem resolution

3 Eng law also gives knowledge of forecasting and analysing available information regarding economic variables and relationships to prove the future

4 Eng law also gives knowledge of contract procedure like the contract parties and contract specifications

5 Eng law also gives knowledge to an engineer for effective planning of projects, directing and controlling resources to meet technical cost

6 Eng law quips engineers with quality management skills for managerial positions for project execution
