

Name: Ukaegbu Kelechi Jane
Matric no. : 18/mhs02/187
Course: physiology
Department: nursing

ASSIGNMENT

1. **ASTIGMATISM:** A condition that causes blurred vision caused by an error in the shape of the cornea. the lens of the cornea, which is the front surface of the eye, has an irregular curve. This can change the way light passes or refracts to the retina.

SYMPTOMS OF ASTIGMATISM

- Eyestrain
- Blurry vision
- Headaches
- Difficulty seeing at night

2. **HYPERMETROPIA:** This is also known as long sightedness or farsightedness and is a form of refractive error in which parallel rays of light coming from infinity are focused behind the light sensitive layer of the retina, when the eye is at rest.

SYMPTOMS OF HYPERMETROPIA

- Headaches
- Eyestrain
- Squints
- Blurred vision
