① Time management is crucial for success and realization of goals.
Discuss succinctly on this statement.

- Time management is crucial for realization of our goals because, it helps us achieve them properly and gives proper account of how long it takes us to achieve the goals because of better scheduling.
- It also reduces the later effects of procrastination.
- Proper account can be given on the duration of the completion of a goal because of better scheduling.

② Examine issues of Non-agricultural social system and its effects on engineering industries.

- Non-chauvanistic attitude towards the support of engineering industries by reluctance of allocating substantial funds for growth and achievement of objectives of industries.
- Poorly insured immunity clauses, exoneration clauses and well-fare clauses, of industrial workers as a result of the blatant disregard of service towards engineering industries.
- Further disregard of work towards engineering industries can lead to vulnerability against law suits and deamunition.
