

EGUAKUN JOSHUA OSADEBAWMEN

CIVIL ENGINEERING

16/ENG03/021

CARRYOVER STUDENT

Q1

In every organization, company or society; there is always legal system being set-up to bring law order and growth not just that but also professionalism and adequacy in development of engineering society. Issues we face in the Nigeria legal system in engineering industry:

1. Corruption
2. Mismanagement of contract jobs
3. Bypass of the task given

Corruption has been one of the top problems on Nigeria economy list since we gain our independence in 1960 and it is still leading today because we have not gathered enough strength and courage to fight this great giant, it has been also the issues where legal representatives can receive bribe from defendant to corrupt the law for a second. In cases of mismanagement of contract jobs many clients are not advice or are ignorant of the law guiding engineering industry thereby contract may be given to family members or friends who aren't professional engineers to carry out the jobs.

Bypass in Nigeria is a common practice that is still in play in engineering industry.

Effect of these cankerworms may leads to

- unemployment,
- low rate on construction contract,
- it brings engineering down to the lane man so it lower the standards
- etc.

Q2

Time management demands a key shift in emphasis: concentrate on results, not on being busy. There are a lot of cases with people who waste their lives in discolored doings and attain very small since they are placing their labors into the incorrect responsibilities or weakening to focus their activity successfully, time management workings directly affect the collective academic achievements. The perception of how their time requires to be used up or planning including utilizing short and long period goals and time attitudes or students accomplished that both planning and encouraging time attitudes initiated that they had much more time to finish their everyday jobs because they experiences more in control of how their time was exhausted therefore knowing when they had to state no to activities.

Time management practices that connected to the individual's awareness and attitudes about time management and is comparable the perception of having control over time. Therefore, time attitudes comprise the perception that the individual is in control of time the perception that the person is efficiently managing his time and the perception that the individual is making constructive utilization of time.
