Engineering in the Society

4 ~~More than the issues of life & death~~

4 Medicine presents us with questions about whether to remove ~~support~~ life support system or to live with good quality of life. The law gives us the need for defense lawyers to defend people who ~~are~~ might be guilty of rape or may engaged in those crimes if released. The engineering department confronts people with hard decision if to whistle blow in order to warn the public of deadly hazard known only to those inside technological operations. The interest in whistle blowing occurs in all ~~the~~ interest in whistle blowing tell something important about engineering, whistle blowing occurs in all professional ethics. Engineers work on projects that affect the safety of plenty plenty people. It dramatizes the moral situation of many engineers.

1) Youtube and other apps are working tirelessly to guide people to the right, verified information published by the WHO or local authorities, by making accurate information available to everyone. Autonomous vehicles can be used to transport affected people to & from the health care facilities with ease. Robots can be used to deliver groceries and other home essentials & also for food deliveries. Carrying test kits and medicine to some specific quarantine locations. In the case of the pandemic management the analytics can help in quickly identifying the infected individuals. Such technologies can help in monitoring movement and tracking people who are quarantined.

2 Every engineer no matter society is mainly concerned with the contributions he can make ~~to the~~ ^{positively} to the development of the society. The main objective of a company to provide service or products to help mankind which is in relation to the definition of an engineer. Their role in the society is professionally provide the development benefit of a group of people who have similar goal.

3 In order to achieve good and well ~~engineers~~ ^{Sustainable goals} like to create strong building & infrastructures, to build or create livable cities or areas, and also help with the constant flow of clean water. ~~And also~~ ^{And also} in cases of natural disasters like the Covid 19, engineers have task to help build a place that can withstand this kind of pandemic.
