

Name:Idris Sadiq Daniel

Department: Computer Engineering

Matric No:17/ENG02/03

ENG LAW

1. I have been getting into new things during the Covid-19 period. Learning new things and involving myself in more work to achieve my goals. I am a computer engineering student so I have been getting involved in programming ceremonies and classes to help improve my abilities and to help get my certificate. I have also been attending school online lectures in order to stay up to date and ready for the schools exams when we resume.
