

Name: Esaduwa Ataire Robert

Dept: Mechanical

Matric: 17/eng06/032

1. During this COVID 19 have been able to participate in the rules and regulations like washing of hands, wearing masks and social distancing guiding the virus and have time for my personal well being. I have been able to attend online classes which are being setup by my school and are very effective and learn and educate myself through the YouTube. I have also had time in impacting my voice through the social media, especially with cases dealing with rape and racism. And I have got time to spend with family
2. Applications of force manures in engineering: If an avalanche destroys a power lines in the French Alps, causing long electricity distribution delays and leading the client to sue for damages. The supplier might employ a force majeure defense arguing that the avalanche was an unforeseeable, external, and irresistible event—the three tests applied by French law. Unless the contract specifically named an avalanche as removing the supplier's liability, the court may well decide that the supplier owes damages.
