Engineering law snap test

Scenarios where Force majeure clause can be applicable in my field of study.

1. pandemic /Epidemic : Force majeure can be ensured in pandemics like the covid19 pandemic, restriction of movement may be ensued to prevent the virus spreading even more. It can come in form of partial or total lockdown, closing down businesses and religious buildings completely keeping the economy on hold. It could also be in form curfew.

Due to this lockdown, resources may be hard to find or wouldn't be available at all. It would also be illegal in some cases to even work.

2. Terrorists: Terrorist attacks could put a lot of business on hold indefinitely.
