Computer Engineering

2.

    Scenario A: As a computer engineering I was given a contract to create a model representation of a automated door sequence while doing that the electrical systems in my house went off resulting to a short circuit in my house electrical systems and as a result my computer was affected.

Scenario B: As a computer engineer I was given a contract to deliver a 3d printed model of a building concept,on my way there was an accident and the concept got destroyed.
