CIVIL ENGINEERING

ENG 384

1.

During the covid 19 period for the past three months my activities were brief , I spent most of the period with academic activities because the covid 19 restricted my movement . well in the first month I did not do much of academic activities because we had not started online classes so I used the opportunity to attend online seminars and learn more about designing of houses and house plan with my auto CAD and orion but at the end of the month we then started online class .

On the second month we were deep into online class and we were given a lot of assignment to do ,so I meanly focused on doing my assignments and attending online classes ,reading my books and doing a lot of research.

On the third month our online classes reduced because we were done with most of the courses so we just had to continue reading till we write exam.
