Write a brief report of your daily activities during the Covid-19 period for the past three months?

Coronavirus disease also known as COVID-19 is a very infectious disease.

Since the virus came into the country, I have been searching causes and theories about the Corona Virus, I have been checking the NCDC reports, and the international states, because of the devastation around, there are have been a lot of problems happening around the world, due to racism.

I have also been able to try to include reading to my daily activities. Even if the online classes do not go well due to Network issues from both ends, I.e. Lecturer/Students, I still try to understand and read the assignments

And the online classes die to the fact we are living with our parents, sometimes we cannot attend or be available for the online classes at all times, because of we sometimes go out as a family to buy provisions for the house or family prayers and are sometimes occupied and forget the online classes

I have also been able to exercise daily to keep the body very fit and not just idle.

These daily activities have been able to keep me in check for the past 3 months.

In Conclusion, for the past three months even though everything is not working out as we planned this year.
