RACISM IN THE WORLD

INTIATION:

Racism is the belief that a particular race is superior or inferior to another, that a person's social and moral traits are predetermined by his or her inborn biological characteristics or skin. The whites believe that they are superior to the blacks including the black Americans or African American they believe they are the first in the world, then Africa is the third world. Racial separatism is the belief, most of the time based on racism that different races should remain segregated and apart from one another. Racism has existed throughout human history racism is caused by language, color, custom, place of birth and skin. It has influenced slavery, wars legal codes.

During the past five hundred to one thousand years racism on the part of the western powers toward non-western has had a far more significant impact on history than any other form of racism the most notorious examples of racism are killing of the blacks and also slavery, particularly the enslavement of Africans, Racists belief that black Africans were less fully humans. Blacks are also seen as beasts than men. They took blacks captives for years and have no respect for blacks they believed they were another kind of people. They kill black because of the hatred they have for them and the treated them like something that is meant to be unseen.

Back in the 50s any black that goes abroad to study was treated like a bad sheep like a sickness they often separate the blacks and the white even in school back the blacks are meant to stay on the side of the class room with poor learning facilities. Black people had no right to answer any question or share their opinion on something. In 1972 a well-known Nigeria publisher Dillibe Onyema was banned from Eton College because he wrote a book on racism, he wrote about the things that happened to him in school. Racism is something the whites are used to, he was 21 when he was a student of the school the pupils of the school

asked him some certain questions like “ why are you black”, “ how many maggots do you have in your hair and “does your mother wear a bone in her nose. Even when he came out with good results they still said he cheated after all the discrimination. This is to show that racism started a long time ago

Racism affects black a lot for example killing, George Floyd, he was a black man he was killed in minneapolis during an arrest for allegedly using a counterfeit bill, Derek Chauvin a white police officer knelt down on George Floyd’s neck for almost nine minutes while Floyd was handcuffed he was trying to explain, his face was on the floor and he was begging for his life saying ‘I can’t breathe’ during the final three minutes Floyd was motionless and had no pulse and the police officer did not remove his legs until medics told him to. George Floyd was not trying to hurt anyone he was even trying to explain himself but they did not listen to you because he was black. Apart from that several stories show that whites favor themselves than blacks another example is when they catch a black man doing something they either put them in jail, kill them or give straight judgement without hearing from them but if it’s a white man they release immediately or give a smaller punishment. This shows the height of inequality they treat us bad but we are not able to say anything.

In conclusion, we can stop racism let’s stop fighting for our rights behind a keypad and go for a peaceful protest, this generation needs to stand up for what is right if not they are going to keep taking blacks for granted. Let’s not take the abuse any more. Ways to stop racism; keep evidence, tell someone people should stand up for each other, report it, get people involved, broadcast it online. There should be a law or punishment that racist will face.
