2. Write short note on urinalysis.

Urinalysis is a simple test that looks at a small sample of your urine. It can help find problems that needs treatment, including infections or kidney problems. It can also help to find serious diseases in the early stages like kidney diseases, diabetes or liver diseases. A urinalysis is also called urine test.

Urine test include:

1. Visual exam
2. Microscopic exam
3. Dipstick test

Some of the things a dipstick examination can check for are:

1. Acidity
2. Protein
3. Glucose
4. White blood cell
5. Blood

A urinalysis can help to detect many diseases before you can feel symptoms.
